Four-fifths, or 80 per Cent., of the profits are appropriated to all Policies of £100 and upwards, every Fifth year, and *without responsibility of Partnership.*

The share of profits allotted to each policy may be added to the sum insured and payable at the death of the life—or its present value in cash may be received—or an equivalent reduction of the future Annual Premium obtained, at the option of the insured.

Assurances effected at lower rates without participation. Reversions purchased, and annuities granted.

## VOLUNTEER CORPS.

Persons insured with this Company are at liberty to serve in any Volunteer Corps within the United Kingdom, without prejudice to their policies.

## “DAYS OF GRACE.”

By the Condition of the Company's Policies, invariably acted upon for upwards of Fifty Years, the period for payment of premiums is not only extended to the days of grace, without forfeiture of the policies, but the sums insured are recoverable, the same as if the claim had risen at any time previously.

While the LIFE FUND (amounting to £354,006, being 69 per cent of the entire net premiums received on every Policy now in existence) is in itself amply sufficient to meet all its Liabilities, assuming that only Three Per Cent. GLASGOW GRAIN AND GENERAL **GRINDING MILLS** AND *COFFEE ROASTING WORKS.*

A FRENCH Scientific Gentleman, who has directed his attention to the subject of Coffee Roasting, says:—I have found that Coffee is better roasted, and more of the aroma retained when a double cylinder is used—the air between the interior and exterior cylinders acting as a non-conductor of heat. It is done more uniformly, while the essential oil on which the aroma depends is less liable to be depressed than when exposed to the fierce heat of a fire in a single cylinder.

In the double rotary globular method of roasting as practised at Mr MINTO'S Works, Græme Street, Glasgow, the above principle is acted upon, in as much as the globe (which has superseded the cylinder since the application of steam power to this branch) revolves in a medium of heated air, which experience has shown best prevents the dispersion of the essential oil aroma.
